

Thanks for buying a Premium Lawn Care Pack

For the best lawn in the street, just follow the simple directions on the back. Warning: Don't be alarmed if you find yourself posting endless pics of your lawn online. Or if your envious neighbours become as green as your lawn. These things happen. A lot. Anyway, here's what's inside your pack:

Acelepryn The gold standard of insect control. One application gets rid of many common bugs feasting on your lawn while also protecting it from the little buggers for up to 6-months after.

All Rounder Lusher, thicker and greener lawns will soon be yours. It also contains beneficial microbes that help your soil become much healthier too.

Aquaturf Your lawns will never be thirsty again. Helps keeps the moisture and nutrients around your lawn's roots. Saving you money on fertilisers and water.

Enhance Makes grass greener grass in just a day while also aiding health and vitality. Apply late in the week and get ready for all the compliments you'll hear at your weekend barbie.

All you need for the perfect backyard

Your 2-part plan for the perfect lawn

Now you've got the right products, lawn care will be easier than ever.

It's a big day. But well worth your while.

- Give your lawn a quick haircut. That way you'll get the best out of your new products.
- Using a spreader apply the **Acelepryn**. 1.5kg will cover 100m² of lawn.
- Grab a quick drink, check the scores then grab your spreader again. 'Cause we're going to apply the **All Rounder** straight over the top at the rate of 2kg per 100m².
- Now it's straight on to **LawnPlay Aquaturf**. Add 200ml per 5L of water and apply directly on top of the fertiliser you've just spread.
- Time to give your lawn a really good drink. Then have a few yourself while reflecting on the fact that you've just protected your lawn for the next 6 months.

6-8 weeks after letting all the above do its stuff.

- By now you'll be fielding all kinds of compliments from your neighbours. Let's crank that up a notch with **LawnPlay Enhance**. Add 200ml per 5L of water and apply directly to your lawn using a sprayer.* Don't water the lawn for 24 hours as **Enhance** will work much quicker without extra water.
- Enjoy your neighbours' looks of envy and, if you really want to show off, apply some more **LawnPlay Enhance** 2 weeks later.

**If you don't have a spreader or a sprayer you can order one from us and get 10% off. Just use this Discount Code: PREMIUM10 at the checkout.*
