2 simple steps to stunning Summer lawns

Now you've got the right products - the rest is easy.

Build a solid Summer base

- First give your lawn a quick haircut so that you make the most of your new products.
- Now apply your **All Rounder** either by hand or with a spreader* at the rate of 2kg/100m².
- Then it's straight on to **LawnPlay Aquaturf**. Add 200ml per 5L of water then spray* it directly on top of the fertiliser you've just spread.
- Time to give your lawn a really good drink. Then have a few yourself while reflecting on the fact that you've just guaranteed yourself a great summer lawn.

*Note: It's hot, so let's keep up those fluids by re-applying **Aquaturf** every month then thoroughly watering your lawn straight after.*

6-8 weeks after letting all the above do its stuff

- By now you'll be fielding all sorts of compliments from your neighbours. Let's crank that up a notch with **LawnPlay Enhance**. Add 200ml per 5L of water and apply directly to your lawn using a sprayer.* Don't water the lawn for the next 24 hours as **Enhance** will work much quicker without the extra water.
- Enjoy your neighbours' looks of envy and, if you really want to show off, apply some more **LawnPlay Enhance** 2 weeks later. You can even up the rate by 50ml for a 'Super Green'.

**If you don't have a spreader or a sprayer you can order one from us and get 10% off. Just use this Discount Code: SIZZLE10 at the checkout.*
